Subject: Thermostat Recycling Corporation's 2011 Annual Report

Dear Ms. Yergeau:

Attached is TRC's annual collection report for calendar year 2011. TRC has made its best effort to provide a comprehensive report on its efforts to promote the collection program in New Hampshire and improve the program's environmental outcomes.

While results are encouraging, much work remains. TRC will continue to aggressively market its program in New Hampshire to encourage participation. We are working with HVAC wholesalers to increase the visibility of the program at their locations and will continue to push information about the program to HVAC contractors and homeowners in the state.

TRC is hoping additional support from the Department is forthcoming. There is an appropriate and necessary role for state regulatory agencies in this effort and we see a number of areas where we can collaborate to enhance program outcomes.

Sincere Regards,

A handwritten signature in black ink, appearing to read "Mark Tibbetts", written over a horizontal line.

Mark Tibbetts
Executive Director

Collection Data

NOMs (orphan)	22	29	0.18
Loose Switches		126	0.78
Total	2085	2611	16.19

TRC recovered 16.19 pounds of mercury from 2085 intact mercury thermostats and 126 mercury switches from New Hampshire collection locations in 2011. TRC exceeded the state's goal of 1585 by 500 thermostats.

TRC recovered 1402 thermostats from HVAC wholesale distributor collection locations and 683 from HHW locations.

Waste Mercury-Added Thermostat Management

Bins with waste mercury-switch thermostats are received at the fulfillment/processing center in Golden Valley, Minnesota. The facility is owned and operated by Honeywell International under contract with TRC.

Bins are received at the loading dock and sent to the TRC processing area. The bin and plastic liner are opened and the contents are identified, sorted, and tallied. The following data is recorded for each bin returned and processed: bin number, business name (location name), city, state, zip code, date returned, number of thermostats and mercury switches by manufacturer and any non-conforming material.

The bin is returned to the location that sent it in with a new prepaid address label within 72 hours of receipt. The thermostats are stored and staged in a plastic lined carton in a storage area for final processing. The containers are dated and processed in order received, first in-first out.

The containers are returned from the storage area to the TRC processing area to have the mercury bulbs removed from the plastic housing. Universal Waste Regulations require the disposal of waste within 12 months of generation. TRC's processor requires that the disposal occur within 6 months of generation and TRC follows

the more stringent requirement. Small quantities of thermostats are removed from the container, which is then closed again, and placed at the bulb removal workstation on a tray that contains any potential mercury spillage. The bulbs are removed from the thermostats and placed into a 2 quart container at the work station. If a bulb breaks and the mercury spills, the work area is designed to contain the spillage and the operators are trained in the clean-up and disposal of mercury. TRC processing area is equipped with special mercury vacuum cleaners and the work area is vacuumed at the end of the work day to assure that any spillage is cleaned up and not left to evaporate.

The 2 quart container is emptied into a special 55 gallon drum which is labeled and dated according to regulations. The drum is sealed with a band and is only opened when contents are being added to it. Special negative pressure venting assures any fumes are drawn away and vented when the drum is opened.

The 55 gallon drum is then shipped to Bethlehem Apparatus Corporation in Hellertown, Pennsylvania for final processing of the mercury ampoules (switches). Bethlehem Apparatus meets or exceeds all local, state, federal and EPA regulations for the management of the product. Bethlehem's approvals for mercury recovery/recycling include:

- EPA - identification No. PAD002390961 (Bethlehem Apparatus Co., Inc.)
- EPA BDAT Requirement - satisfied by all recovery operations
- CERCLA (Comprehensive Environmental Response Compensation and Liability Act)
- Pennsylvania Department of Environmental Protection

The facilities' processing follows all EPA guidelines and regulations. TRC has a facility license from Hennepin County Minnesota for the operation of the TRC. Honeywell, Inc. has a Hazardous Waste Generator license from Hennepin County. All persons who handle mercury thermostats as part of the TRC operation receive training in the handling of Hazardous Waste and Universal Waste.

Program Education and Outreach

TRC marketing and promotion efforts targeted key audiences in New Hampshire. Our objectives are to raise awareness of key components of New Hampshire's mercury thermostat law and to encourage the recycling of waste mercury thermostats. Below is a summary of activities and channels we utilized in support of this effort.

Development of Written Materials and Signage for Collection Points and Key Stakeholders—TRC developed and posted on its website (www.thermostat-recycle.org) a Promotional Toolkit which contains templates of a number of items for collection points to download and reproduce:

In 2011 TRC added three new items to the toolkit. The new items include two new posters and two versions of a point-of-sale card.

Exhibit 1: Examples of Toolkit Items

Poster

Advertisement

In addition to the templates on TRC's website, TRC placed the new window cling (ideal for the entrances of collection locations) into inventory along with the two new 11 x 17 posters and a postcard. TRC provides the cling and a copy of the "law" poster to all new locations in New Hampshire. TRC promotes the availability of these materials during routine contact with collection locations and provides copies upon request to any participating location, HVAC contractor or local government agency. These items are also distributed at trade shows.

Exhibit 2: Examples of Print Collateral

Poster

Window Cling

Wholesaler/HHW Engagement—Under New Hampshire law, manufacturers were required to avail collection containers to HVAC wholesale distributors, thermostat retailers, and local governments that request containers. TRC continued efforts to engage wholesalers in New Hampshire and added several new locations in 2011. TRC put a particular emphasis on increasing the level of participation among New Hampshire distributors. For instance TRC added the logos of New Hampshire distributors United Refrigeration, API, and S.G. Torrice and Company to its website highlighting their participation in the program.

In **October 2011** TRC sent correspondence (See Appendix A and B for samples) to all wholesale and HHW collection locations that had not sent TRC a container in the last 12 months. The correspondence reminded locations that in accordance with universal waste regulation they are required to ship thermostats to TRC within one year of the accumulation start-date. TRC also provided a toll-free number and email address to assist locations needing shipping labels.

TRC continued to promote the program to HVAC wholesale distributors. For instance, in partnership with the Heating Airconditioning, Refrigeration Distributors International (HARDI) TRC launched the inaugural *Mercury Thermostat Recycling Awards* in **May 2011**. The awards were intended to incent participation in the program by recognizing the distributor(s) that recovered the most mercury thermostats and/or developed innovative strategies to promote the program at its location(s). The program was widely promoted by HARDI to its members and within the industry trade press. TRC also developed custom promotional materials for HARDI members and templates of those materials are available on TRC's website. The awards were presented at HARDI's annual meeting in **October 2011**.

Summary of Additional Education and Outreach by Channel

TRC conducted a broad array of activities intended to raise awareness of New Hampshire's mercury thermostat disposal ban, mandatory HVAC contractor recycling, and the ease of compliance through TRC's collection program.

Earned Media— TRC generated considerable positive media attention in 2011. TRC made a concerted effort in 2011 to generate stories on the program. Most notable was the four page article in *The Air Conditioning, Heating, and Refrigeration News (The News)* which included a TRC provided table on mercury thermostat laws. *The News* is one of the leading industry publications.

Publication/Website	Month	Coverage	Readership/Reach
<i>Air Conditioning, Heating & Refrigeration News</i>	January	Article on thermostat recycling and TRC	111,000
<i>RSES Journal</i>	January	TRC & HARDI partnership	18,000
<i>HVACR Business</i>	April	Guest Column thermostat recycling	33,000
<i>Indoor Comfort News</i>	June		25,000
<i>Air Conditioning Today</i>	June	2010 TRC annual report	n/a
ACCA-Hot Air! Blog	July	TRC program	n/a
Wholesale Observations (HARDI)	July	TRC program	n/a
<i>Demolition Magazine</i>	July/August	Proper management of mercury	n/a
<i>Indoor Comfort News</i>	July	2010 TRC annual report	25,000
<i>1800recycling.com</i>	September	Recycling old thermostats	N/A
<i>Contracting Business</i>	October	Thermostat recycling awards	29,000
<i>Indoor Comfort News</i>	October	USACD thermostat recycling	n/a
<i>Supply House Times</i>	October	Thermostat recycling awards	12,800

The National Demolition Association (NDA) also ran a multi-page article authored by TRC's executive director on the proper management of mercury containing products found in residential and commercial structures in the **June/July** issue of *Demolition Magazine*. Reprints of several

of these articles may be found on TRC's website at <http://www.thermostat-recycle.org/media/index>.

Website—TRC's maintains www.thermostat-recycle.org. The website contains participation forms, the previously mentioned outreach toolkit, safety and shipping information, media releases, and reports. The website includes a location search utility that provides for an easy search by zip-code of locations that have ordered TRC collection containers. TRC also promotes its national collection partners by scrolling their corporate logos on the homepage. In **September 2011** TRC completed a *search engine optimization* (SEO) of its website. The objective of the SEO was to increase website traffic by making TRC easier to find on the internet. For instance if a person searches on the term "mercury thermostat recycling" or "thermostat recycling" the first search result is TRC's website.

Web-based advertising— TRC developed new rotating banner advertisements for 2011 and ran them (Exhibit 3) on the websites contractingbusiness.com (160x600 skyscraper) and hvac-talk.com (300x250 medium rectangle) during the months of **April, May, September** and **October**. Together, the websites average 1.8 million pages views and 280,000 unique visitors per month. HVAC-Talk.com, an online discussion community, boasts 122,000 registered users.

TRC strategically placed ads to coincide with the spring and fall HVAC business cycles. While the ads were featured, 701,528 impressions were delivered and 522 clicks on the advertisements were recorded.

Exhibit 3: Web Banner Advertisement (300 x 250 version)

Social Media— TRC developed and deployed a Social Media strategy that leveraged the power of Google and the popularity of Facebook. This campaign, which ran from **mid-September** through early **December 2011**, geo-targeted contractors and consumers in states with mercury thermostat disposal bans, including New Hampshire, in an effort to create awareness and increase thermostat collections.

Ads (See Exhibit 4) were developed with variable messages targeting both audiences. Advertisements appeared on Google search results pages after an individual searched terms related to TRC's mission (E.g. thermostat replacement, contracting recycling regulations,

mercury thermostat recycling, programmable thermostats, etc.). Similarly, the Facebook campaign targeted users over 18 who "like" industry-relevant topics or organizations (i.e. renovating, renovators, HVAC, HVAC Technicians, home repair, etc.)

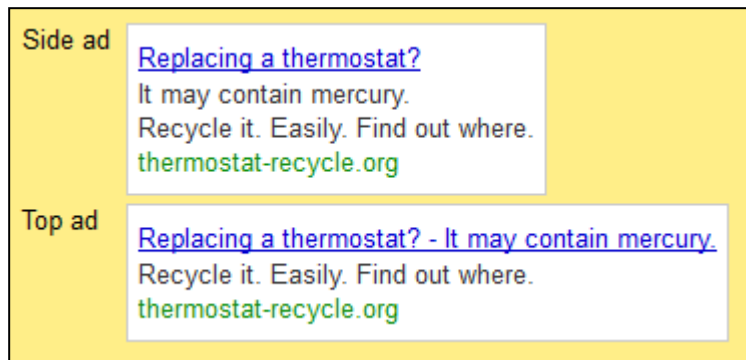

The campaign was very successful. The campaign resulted in over 340,000 impressions on Google and 8.1 million on Facebook.

Tip-In Insert in HVAC Trade Press—TRC placed an insert in the **April 2011** and **October 2011** issues of *HVACR Business* (see Exhibit 5). The insert was included in issues received by approximately 12,000 subscribers in states with mercury thermostat disposal bans (including New Hampshire). This enabled TRC to incorporate the message, “It’s something you gotta do, because it’s the law.” Additionally, TRC incorporated the logos of larger HVAC wholesale distributors on the backside of the card enabling contractors to quickly identify collection locations.

Tradeshows—TRC attended and exhibited at the following trade shows relevant to New Hampshire:

January 31-February 2: AHRExpo. Las Vegas. AHR Expo is the largest national trade show for the HVACR industry. TRC staff exhibited and promoted the program to HVAC contractors, manufacturers and distributors. The show had a total registered attendance of over 53,000. Specifically, 944 attendees were from New England.

Exhibit 4: Examples of Google and Facebook Advertisements

February 15–17: Air Conditioning Contractors of America Indoor Air Expo, San Antonio, Texas. Representatives from over 200 HVAC contracting businesses attended the show.

May 22-26: National Association of Oil and Energy Service Professionals. Hershey, PA. This was OESP's annual convention and trade show. Nearly 2,700 HVAC professionals attended this show, which targeted service managers for HVAC firms that install and repair oil fired furnaces (a high percentage of New Hampshire homes heat with oil).

September 27-29: North American Hazardous Materials Management Association (NAHMMA), Portland, Oregon. This was NAHMMA's annual meeting. TRC exhibited and co-presented with a HARDI representative.

October 23-26: Heating Airconditioning and Refrigeration Distributors International (HARDI). Maui, Hawaii. TRC exhibited and participated in the "Booth Program," which provides for 1-on-1 sessions with senior executive staff from HARDI member companies. This event targeted representatives of approximately 80% of the wholesale market for HVACR products. TRC also presented the inaugural Thermostat Recycling Award to three HVACR distributors recognizing their support of the program.

Exhibit 5: Tip-in Insert *HVACR Business*

Fact 1:
Recycling mercury thermostats is easy.

Fact 2:
Recycling is good for business. (customers like environmentally friendly businesses)

Fact 3:
It's something you gotta do, because it's the law.

And we're the ones who make it easy.

We know you have a lot to do in a day and the last thing you want is a hassle. Which is exactly why, when it comes to recycling mercury thermostats, keeping it simple is a must.

So the next time you complete a job, hang onto the thermostats you remove, then go to thermostat-recycling, find the nearest state wholesaler drop-off site that's part of our network and just drop them off. That's all you have to do.

The service is free and easy, very easy indeed.

Thermostat Recycling CORPORATION
an independent, non-profit

www.thermostat-recycle.org

These HVACR wholesale distributors are proud to be TRC collection partners:

APR SUPPLY CO.
Your local, family owned source of Heating, Cooling & Venting supplies.

Goodman
GOODMAN DISTRIBUTION, INC.

R.E. MICHEL COMPANY, INC.

LENNOX
Innovations never stop at Lennox.

Direct Mail— TRC implemented a direct-mail campaign in New Hampshire in 2011. TRC mailed a postcard (see Exhibit 6) to approximately 860 New Hampshire based HVAC contractors in **March** and **October**. TRC sourced the list of HVAC contractors from a commercial list supplier.

Exhibit 6: Front & Back of Postcard

Stakeholder Outreach— TRC sent correspondence (See Appendix C) to a number of HVAC and construction trade groups in New Hampshire. Letters were sent in **December 2011**. TRC staff followed up the letters with phone calls to staff at each organization encouraging them to use TRC provided copy in their member newsletters or in other communications.

Plumbers, Fuel Gas Fitters & HVAC Assn of NH
PHCC
Oil Heat Council of NH

Program Expenses

TRC is a national voluntary program that is also operating nine mandatory programs on behalf of its manufacturer members. As most promotional activities are run concurrently in multiple states tracking and isolating expenses specifically to New Hampshire is not possible. Below is a summary of TRC's national program expenses for 2011. A copy of TRC's 2010 IRS Form 990 is also available for inspection.

Exhibit 3: 2011 Program Administrative Expenses

TRC Staff and Administration	\$ 255,617
Recycling Costs	\$ 299,877
Insurance	\$ 13,945
Statutory Incentive Payments	\$ 37,860
New Collection Containers	\$ 18,859
Travel	\$ 28,108
Legal	\$ 93,272
Direct Expenses for Marketing & Outreach	\$ 123,221
Total	\$ 870,760

TRC expenses include:

- **TRC Staff and Administration:** Includes staff and consultants, general office expenses, telecommunications, and other administrative expenses. Includes staff labor costs to implement New Hampshire program.
- **Insurance:** Pollution and liability insurance.
- **TRC made \$37,860 in direct incentive payments on behalf of manufacturers as required by Maine and Vermont law.** This does not reflect the administrative costs associated with the incentive program.
- **Travel:** All travel in 2011 includes travel to trade shows to promote program.
- **Recycling Costs:** All costs (including labor) associated with transporting, processing, and properly managing waste thermostats. Also includes cost associated with fulfilling new bin orders and data management.
- **New Collection Containers:** Direct cost for new containers ordered in 2011.
- **Marketing/Outreach & Printing:** Includes direct costs to develop and print program collateral; direct mail, national and state advertising, sponsorships marketing consultants, some web and IT consulting, and other outreach activities. Marketing/Outreach does not include any TRC labor costs.

Recommendations/Next Steps

New Hampshire's thermostat law went into effect in January 2009. Since the law's passage, TRC has averaged 60% annual growth and the cumulative increase in collections is nearly 300%. And while results are encouraging, significant challenges remain. The most significant barriers to growth are:

- Collection point engagement: Of the approximately 70 wholesale distributor locations in New Hampshire, less than 20 returned a container to TRC last year. This is despite a number of direct and indirect efforts to increase the level of wholesaler engagement in New Hampshire.
- HVAC contractor engagement: HVAC contractors are not taking advantage of TRC's program. Only a limited number of contractors are bringing waste thermostats to HVAC wholesalers and efforts to directly market the program to contractors (larger contractors may order a bin direct from TRC for the \$25 participation fee) have been for the most part ignored.
- Few opportunities for direct marketing: By TRC's estimates there are over 700 HVAC contracting businesses in New Hampshire employing several thousand technicians. Most do not belong to trade groups. The only New Hampshire specific direct marketing channel available to TRC is direct mail.
- HHW participation: Despite the August mailing to over 100 HHW locations, less than 20 responded. And of those that did respond, a substantial minority sent TRC prohibited items including other mercury devices, elemental mercury, and smoke detectors.

In an effort to sustain and grow collections TRC plans on the following New Hampshire marketing efforts:

- Stakeholder engagement: TRC will again send letters and promotional materials and follow-up via telephone various organizations in New Hampshire encouraging them to educate their members about thermostat recycling. TRC will specifically target the new Plumbers, Gas Fitters, and HVAC Association of New Hampshire
- TRC will increase the frequency of direct mail and will send a postcard to New Hampshire HVAC contractors four times in 2012.
- Paid Advertising: TRC will continue to use paid advertising to promote the program. TRC is already advertising in OESP's weekly online newsletter. TRC is reviewing various strategies and will update the Department as plans are completed.
- Earned media. TRC will continue to aggressively court the industry trade press and seek coverage of the program.
- Trade Shows: TRC will continue to attend and exhibit at national trade shows in 2011. Moreover, OESP's annual meeting is in Providence this year. TRC is a sponsor of the meeting and will exhibit at its trade show.
- Engage HVAC wholesale distributors: The distributors are essential to the program's success. Contractors must know their local distributor is collecting waste mercury thermostats. The program must be visible at each location and staff must be aware of the program. TRC is working directly with many distributors to increase the visibility of the program.
- Conduct New Hampshire site visits. TRC will plan another round of visits to New Hampshire wholesale locations.

Appendix A: Sample of Correspondence to HHW locations in NH

October 14, 2011

[REDACTED]
CONCORD, NH 03301-0000

To Whom It May Concern:

I want to remind you that New Hampshire universal waste regulations require that wastes such as mercury thermostats be stored for no longer than 12 months from the start date of accumulations.

According to our records, your location previously ordered a mercury thermostat recycling container. However, to date, our records indicate we have never received any waste mercury thermostats from this location. If you have thermostats in the container, please ship it to us promptly.

If you no longer have a container, need another pre-paid shipping label, or wish to no longer participate in the program, please contact Neisha Johnson immediately at 888-266-0550 or by email at trc@thermostat-recycle.org.

Regards,

A handwritten signature in black ink, appearing to read "Mark Tibbetts".

Executive Director

Appendix B: Sample of Correspondence wholesale locations in NH

October 12, 2011

[REDACTED]
[REDACTED]
DOVER, NH 03820

To Whom It May Concern:

Legislation passed in 2010 requires all HVAC wholesale distributors with facilities in New Hampshire to act as a collection point for waste mercury-switch thermostats. I want to remind you that New Hampshire universal waste regulations require that wastes such as mercury thermostats be stored for no longer than 12 months from the start date of accumulations.

According to our records, your location received container(s) in order to comply with New Hampshire law. However, to date, our records indicate we have never received any waste mercury thermostats from this location. If you have thermostats in the container, please ship it to us promptly.

If you no longer have a container or if you need another pre-paid shipping label, please contact Neisha Johnson immediately at 888-266-0550 or by email at trc@thermostat-recycle.org.

Regards,

Mark Tibbetts
Executive Director

Appendix C: Correspondence to New Hampshire Stakeholder Organizations

SUBJECT: INFORMATION ON NEW MERCURY THERMOSTAT LAW

December 1, 2011

NHPMC/PHCC
PO Box 127
Candia, NH 03034

To Whom It May Concern:

This letter is to inform you of a new legal requirement that may affect your members. Legislation that bans the disposal of mercury thermostat in the trash was amended and now provides easy and free recycling of waste mercury thermostats. It also requires HVAC contractors to recycle all thermostats they remove from service. Contractors may not leave them at the customer's premise.

The good news is that this mandate is very easy to comply with. Manufacturers must provide a no-cost recycling program to contractors and all HVAC wholesalers in New Hampshire must act as a collection point. The Thermostat Recycling Corporation (TRC) is an industry funded not-for-profit organization that is implementing manufacturers' program in New Hampshire and other states.

We are interested in working with your organization to increase awareness about the legal obligations of the HVAC industry and TRC's program. We attached information we hope you will share with your members. We plan to follow-up with you to discuss ideas on further promoting the program and ways to help protect New Hampshire's environment.

For more information, please contact me at 703-841-3243 or email Neisha.johnson@nema.org. Additional information is also available at TRC's website at www.thermostat-recycle.org.

Regards,

Neisha Johnson
